The C-3805-DM Kit includes the items shown in Figure 1, Figure 2, and Figure 3.

**Installation:**

1. Grease Spacer and insert Spacer into Eye at end of Spool as shown in Figure 4.

2. Turn Spool horizontally to prevent Spacer from falling out or moving when installing Piston Assembly. Push Piston Assembly all the way onto Spool as shown in Figure 5.

3. Insert Set Screw, apply LocTite, and tighten Set Screw until it is below flush with Piston Assembly as shown in Figure 6.

4. Slide Cap Screws through Lock Washers (provided) and Piston Assembly as shown in Figure 7.

5. Install Vent on Cylinder Body with Vent pointing down as shown in Figure 8.

6. Install Vent Tube back to cab for exhaust as shown in Figure 9.
