

APSCO INCLINOMETER

APSCO INCLINOMETER

Intelligent electronic system for truck & trailer tip-over prevention

- MEMS single axis inclinometer continually measures left to right angle of the vehicle
- In-cab display screen provides driver with real time slope angle
- System is armed when PTO is engaged and alarms on out of range slope condition
- Output relay available to control buzzer, warning light, or hoist interrupt valve
- Adjustable trip point settings (pass-code protected)

DATA RECORDING:

The system records all alarm events along with a time and date stamp. In the event of an incident this data can be retrieved via USB
